

Gerd Keiser served as a chair professor in the Department of Electronic Engineering at the National Taiwan University of Science and Technology until September 2011. Currently he is the president and principal consultant of PhotonicsComm Solutions. He is involved in telecom and biomedical photonics research and applications, such as component development, telecom transmission systems, fiber-to-the-premises (FTTP) networks, and intelligent building networks. He has written four books related to photonic devices and communication networks. He is an IEEE Fellow and an Associate Editor of Optical Fiber Technology.
